

Erwin Rodrigo

Entry-Level Frontend Developer | React, TypeScript, Vite, Tailwind CSS
Philippines | +63 908 498 2571 | erwinrodrigo0303@gmail.com | github.com/LanceCracker04

PROFESSIONAL SUMMARY

Entry-level Frontend Developer focused on building responsive web applications, dashboards, and practical full-stack tools. Hands-on experience with React, TypeScript, Vite, Tailwind CSS, Firebase, Flask, and Python through real projects. Strong in UI implementation, CRUD workflows, API-connected interfaces, debugging, clean component structure, and technical documentation.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript ES6+, TypeScript, React, React Router, Vite, Tailwind CSS

Backend & Cloud: Firebase Authentication, Firestore, Flask, Python, REST API integration

Tools: Git, GitHub, npm, VS Code, Chrome DevTools, Vercel, ESLint

Core Strengths: Responsive design, component-based UI, CRUD features, PDF generation, basic web security awareness, documentation

PROJECT EXPERIENCE

BookEase | Appointment Booking Web App | [GitHub](#)

- Built a responsive appointment booking platform for service businesses with a landing page, booking portal, admin dashboard, and service showcase.
- Organized the app into reusable React components and page-level modules to keep the codebase easier to maintain and scale.
- Implemented mobile-friendly UI patterns using TypeScript, React Router, Vite, and Tailwind CSS.

Invoice App | Invoice Management Dashboard | [GitHub](#) / [Live Demo](#)

- Created a modern invoice management app for generating, managing, and exporting professional invoices.
- Implemented invoice creation, persistent Firebase-backed storage, responsive dashboard UI, and PDF export using jsPDF.
- Used React, Vite, Tailwind CSS, Firebase, Lucide React, and ESLint to support a clean development workflow.

VanGuard Link | Full-Stack URL Risk Scanner | [GitHub](#) / [Live Demo](#)

- Built a full-stack URL scanning tool that analyzes suspicious links and returns instant risk feedback before users click.
- Connected a Vite + JavaScript frontend to a Flask/Python backend for heuristic URL analysis, risk scoring, and verdict display.
- Presented security results clearly through a high-contrast UI while keeping the scanner positioned as a demonstration tool.

TECHNICAL TRAINING

Self-Directed Technical Training | Frontend Development & Web Security | 2024 - Present

- Studied React, Vite, Tailwind CSS, Firebase, JavaScript, GitHub workflows, and frontend debugging through project-based learning.
- Built and deployed practical projects including a booking platform, invoice dashboard, and URL risk scanner.
